<b>Office Action Summary</b>	<b>Application No.</b> 09/822,495	<b>Applicant(s)</b> YOSHIKAWA ET AL.	
	<b>Examiner</b> Jayprakash N. Gandhi	<b>Art Unit</b> 2125	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 18 is objected to because of the following informalities: the dependency should be 12 not 19. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 8, "**a memory device**" is unclear, as is this the same device as claimed in the independent claim 1 or the applicant is introducing another device. Claim 3 is included in this rejection because of their dependency.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-33 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Murray (US 4413277, cited by the applicant).

Regarding claims 1, 12, 23,25, 29 and 32, Murray discloses all the elements of the claimed invention of a work data collection, including a video camera (10) a memory device (12), a memory device (18), display (14), sensors (33), microphone (26), real time clock (16), except positively disclosing of having a break point signal and biological sensor. It is inherent properties of Murray system to perform a work data collection method, which includes all the claimed elements and can perform the method of a work data collection.

Regarding claims 2-11, 13-22, 24, 26-28, 30-31 and 33, as stated above already-modified system of Murray can perform other limitations of the dependent claims including, scanning of a bar code, which is very well known in retail or manufacturing industries for item identification. As for the biological sensor, Murray discloses motion sensor 33, as in [http://en.wikipedia.org/wiki/Sensor#Biological\\_sensors](http://en.wikipedia.org/wiki/Sensor#Biological_sensors), which in broad term can be considered as a biological sensor.

## **Biological sensors**

All living organisms contain biological sensors with functions similar to those of the mechanical devices described. Most of these are specialized cells that are sensitive to:

- light, motion, temperature, magnetic fields, gravity, humidity, vibration, pressure, electrical fields, sound, and other physical aspects of the external environment;

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ferriter, Andrus et al., and Fukai et al. disclose related art.
